

BULL FLOAT

FOR CONCRETE FINISHING

TRP Bull Float is designed for leveling and smoothing of freshly placed concrete to produce a uniform, flat surface. Built with high-quality materials for durability and long-lasting performance on site.

DURABLE CONSTRUCTION

Made from high-quality Magnesium Alloy for strength and longevity.

LIGHTWEIGHT DESIGN

Lightweight build for easy handling and operator comfort.

SMOOTH FINISH

Provides a smooth, level finish on concrete surfaces.

ADJUSTABLE HANDLE

Compatible with three pipes (2 meter each) to adjust height up or down.

PRODUCT FEATURES

- ✓ High strength Magnesium Alloy blade
- ✓ Lightweight and easy to handle
- ✓ Provides superior leveling of concrete surface
- ✓ Compatible with standard pipe handles
- ✓ Adjustable working height
- ✓ Ideal for large area concrete finishing
- ✓ Corrosion resistant and long life

TECHNICAL SPECIFICATIONS

MATERIAL	Magnesium Alloy
WEIGHT	5.5 Kg
LENGTH	1220 mm (4 ft)
BREADTH	200 mm (0.65 ft)
HANDLE	2 meter
NO. OF PIPE IN HANDLE	Three Pipe (2 Meter Each Pipe)
GEAR	Work In Slant Height To Adjust Up & Down
