PRODUCT OVERVIEW

PVC Manhole Katori is a specially designed rubber/PVC seating insert used inside precast concrete manholes. It creates a proper seating surface between the manhole frame and cover, reducing vibration, minimizing noise, improving alignment, and increasing the service life of the manhole system. It also helps prevent damage caused by continuous traffic movement.

FEATURES

- Water Resistant
- Long Service Life
- Easy Installation
- Accurate Fit
- Low Maintenance
- Heavy Duty Construction
- Excellent Load Bearing
- Noise & Vibration Reduction
- Weather Resistant

APPLICATIONS

- Municipal Roads
- Smart City Projects
- Highways
- Industrial Areas
- Residential Roads
- Commercial Complexes
- Drainage Systems
- Sewer Networks
- Utility Chambers

ADVANTAGES

- Reduces cover movement
- Prevents concrete damage
- Improves seating accuracy
- Enhances manhole durability
- Suitable for heavy traffic
- Cost-effective maintenance solution

WHY CHOOSE TRP MACHINES & TOOLS?

- Quality Construction Products
- Reliable Manufacturing
- Fast Delivery
- Competitive Pricing
- Technical Support
- PAN India Supply
