

SWIVEL CLAMP

STRONG GRIP. FLEXIBLE CONNECT.

TRP Swivel Clamp is an essential component in Mivan formwork systems, designed to provide strong and adjustable connection between tie rods and formwork panels. It allows angular movement for perfect alignment and secure clamping, ensuring stability, accuracy, and faster assembly at the construction site.

STRONG & DURABLE

SECURE HOLD

SWIVEL ACTION
FOR ALIGNMENT

IDEAL FOR
MIVAN FORMWORK

FEATURES

- High strength and heavy-duty construction
- Swivel design for angular adjustment
- Firm grip and high load-bearing capacity
- Corrosion resistant and long lasting
- Compatible with standard Mivan tie rods
- Easy to install and remove
- Reusability reduces overall cost

TECHNICAL SPECIFICATIONS

PARAMETER	DETAILS
Product Name	Swivel Clamp
Material	High Grade Steel
Surface Finish	Zinc / Yellow Galvanized
Clamp Type	Swivel Type
Rod Compatibility	For 15/17 mm Tie Rod
Load Capacity	High Load Bearing
Usage	Mivan Formwork System
Weight	Approx. 0.95 kg (Pair)

APPLICATIONS

- Used in Mivan formwork and shuttering systems
- Connects tie rods to formwork panels
- Allows alignment in different angles
- Ensures stability and proper tightening
- Suitable for walls, columns, and core structures
- Ideal for residential, commercial, and infrastructure projects

PRECISION ENGINEERED | RELIABLE PERFORMANCE | BUILT TO LAST
