

CONE WALL TIE

TRP Cone Wall Tie is a robust and reliable solution used in concrete construction to hold cone forms in position and maintain proper spacing between opposite tie holes. It ensures accurate alignment, strength, and a smooth concrete finish.

STRONG & DURABLE

RELIABLE HOLD

ACCURATE ALIGNMENT

FEATURES

- Manufactured from high-quality steel
- High strength and load-bearing capacity
- Pre-drilled holes for easy installation
- Corrosion resistant with black finish
- Ensures proper form alignment and spacing
- Reusable and cost-effective

APPLICATIONS

- Used in holding cone forms in wall construction
- Maintains accurate spacing between tie holes
- Suitable for residential, commercial and infrastructure projects
- Ideal for Mivan and conventional construction systems

TECHNICAL SPECIFICATIONS

PARAMETER	DETAILS
Product Name	Cone Wall Tie
Material	Mild Steel
Thickness	6 mm
Width	40 mm
Length	As per Requirement
Holes	3 Round Holes
Hole Diameter	18 mm (Standard)
Finish	Black / Natural
Application	Cone Formwork Wall Construction
